

1323 Knee – Polycentric 5 Bar

Lotus Adapter

The 1323, is designed to be a very stable 5 Bar Knee with a large stance flexion angle (up to 12°). Weighing in at less than 1KG and having extensive alignment adjusting abilities give the S-600 knee a smooth and natural gait pattern.

The 1323 knee joint is a polycentric knee with stance flexion control for maximum safety during stance and is best suited to be used for low to high K3 level. Practitioner adjustable from extreme stability to high stance flexion. The 1323 offers a pneumatic cylinder with independent flexion extension adjustment for swing phase. Can be used for either above knee or knee disarticulation.

The frame construction is made of superlight aluminum alloy and the 5-bar linkage is made of aircraft alloy. All axes have built-in bearing which allow for ultra smooth walking movement. The proximal attachment has A-P slide and Rotation adjustment. Optional adapters are pyramid adapter (for AK) and lotus adapter (for KD).

PDAC approved HCPCS code(s)
• L5840, L5845, L5850
